Transwede Airways - An Airline of Today

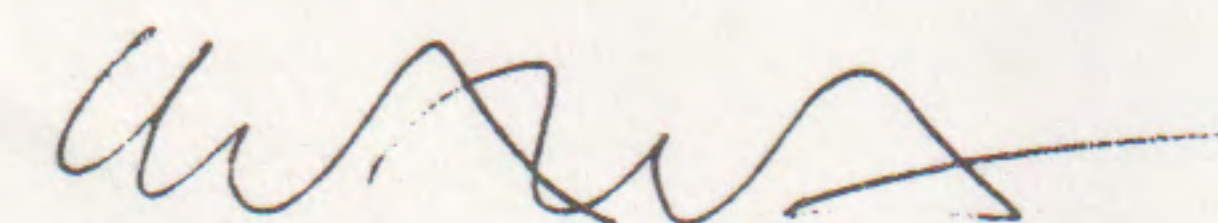

Transwede Airways' modern fleet of 14 MD83 and Fokker 100 aircraft meet the most exacting and rigorous standards of security and technical maintenance. Our consistently excellent performance in this department is such that we have been recognised officially by the manufacturer's prestigious "World Class Carrier" award. We are especially proud of our sophisticated CAT III equipment, which allows us to land in almost zero visibility with complete safety at airports with a compatible system.

At Transwede, our concern about the world in which we live is reflected in our choice of aircraft. The Fokker 100 not only offers fuel efficiency and hence low running costs, it is also the most silent and environmentally friendly aircraft available on the market. This is to the benefit both of passengers on-board and those communities living close to our flight paths. We are committed to providing a frequent service throughout the day, offering the lowest possible fares, without disturbing our neighbours on the ground or adversely affecting the environment. In Sweden, many people regard flying as their main mode of transport for business and leisure travel. The alternative is often a 10 or 20 hour journey by car or train. Stockholm-Arlanda, Europe's sixth largest airport, operates flights to approximately 20 domestic destinations to meet the transport requirements both of the Swedish population and visitors from abroad.

Transwede operates both its domestic and international services from the same section of Arlanda's Terminal 2. This means fast connections, quick turnaround times and no exhausting transfers with heavy luggage. The distance between arrival and departure points, when changing from an international to a domestic flight involves no more than a 50 metre walk, and it could be as short as 5 metres!

When you fly with Transwede Airways your comfort is our business!

Welcome to Transwede!
