GETTING there

BEING there

Flying enables you to speed up business—and gives you an edge on competition that is still using slower transportation. American Airways planes are comfortably heated in winter—cool in summer. When you fly you arrive at your destination feeling clean, rested, and refreshed.

A Nation-Wide Network of Airlines

Serving 72 of the principal American and Canadian cities with scheduled air transportation, American Airways, Inc., is one of the world's outstanding air transport companies. Its operating procedure is the result of experience gained conducting scheduled plane services since 1926, flying more than 46 million miles in all sections of the United States.

On all its lines, American Airways employs the finest equipment, the highest trained personnel, that can be secured. Modern planes, designed especially for their purpose, subject to constant and thorough inspection, are flown by veteran pilots. Radio, radio beacon, lighted airways (where night flying is conducted), lighted airports, advance weather reports from Government and special American Airways weather observers—every proven aid to swift, safe air transportation is in constant use throughout the American Airways system.

American Airways is organized to serve the traveling public with the finest in modern transportation. Wherever your needs take you—whether you go for business or pleasure—use American Airways for speed, for comfort and for safe arrival—"from Coast to Coast; from Canada to Mexico."
