Webster's New International Dictionary

The Influence OF FLIGHT

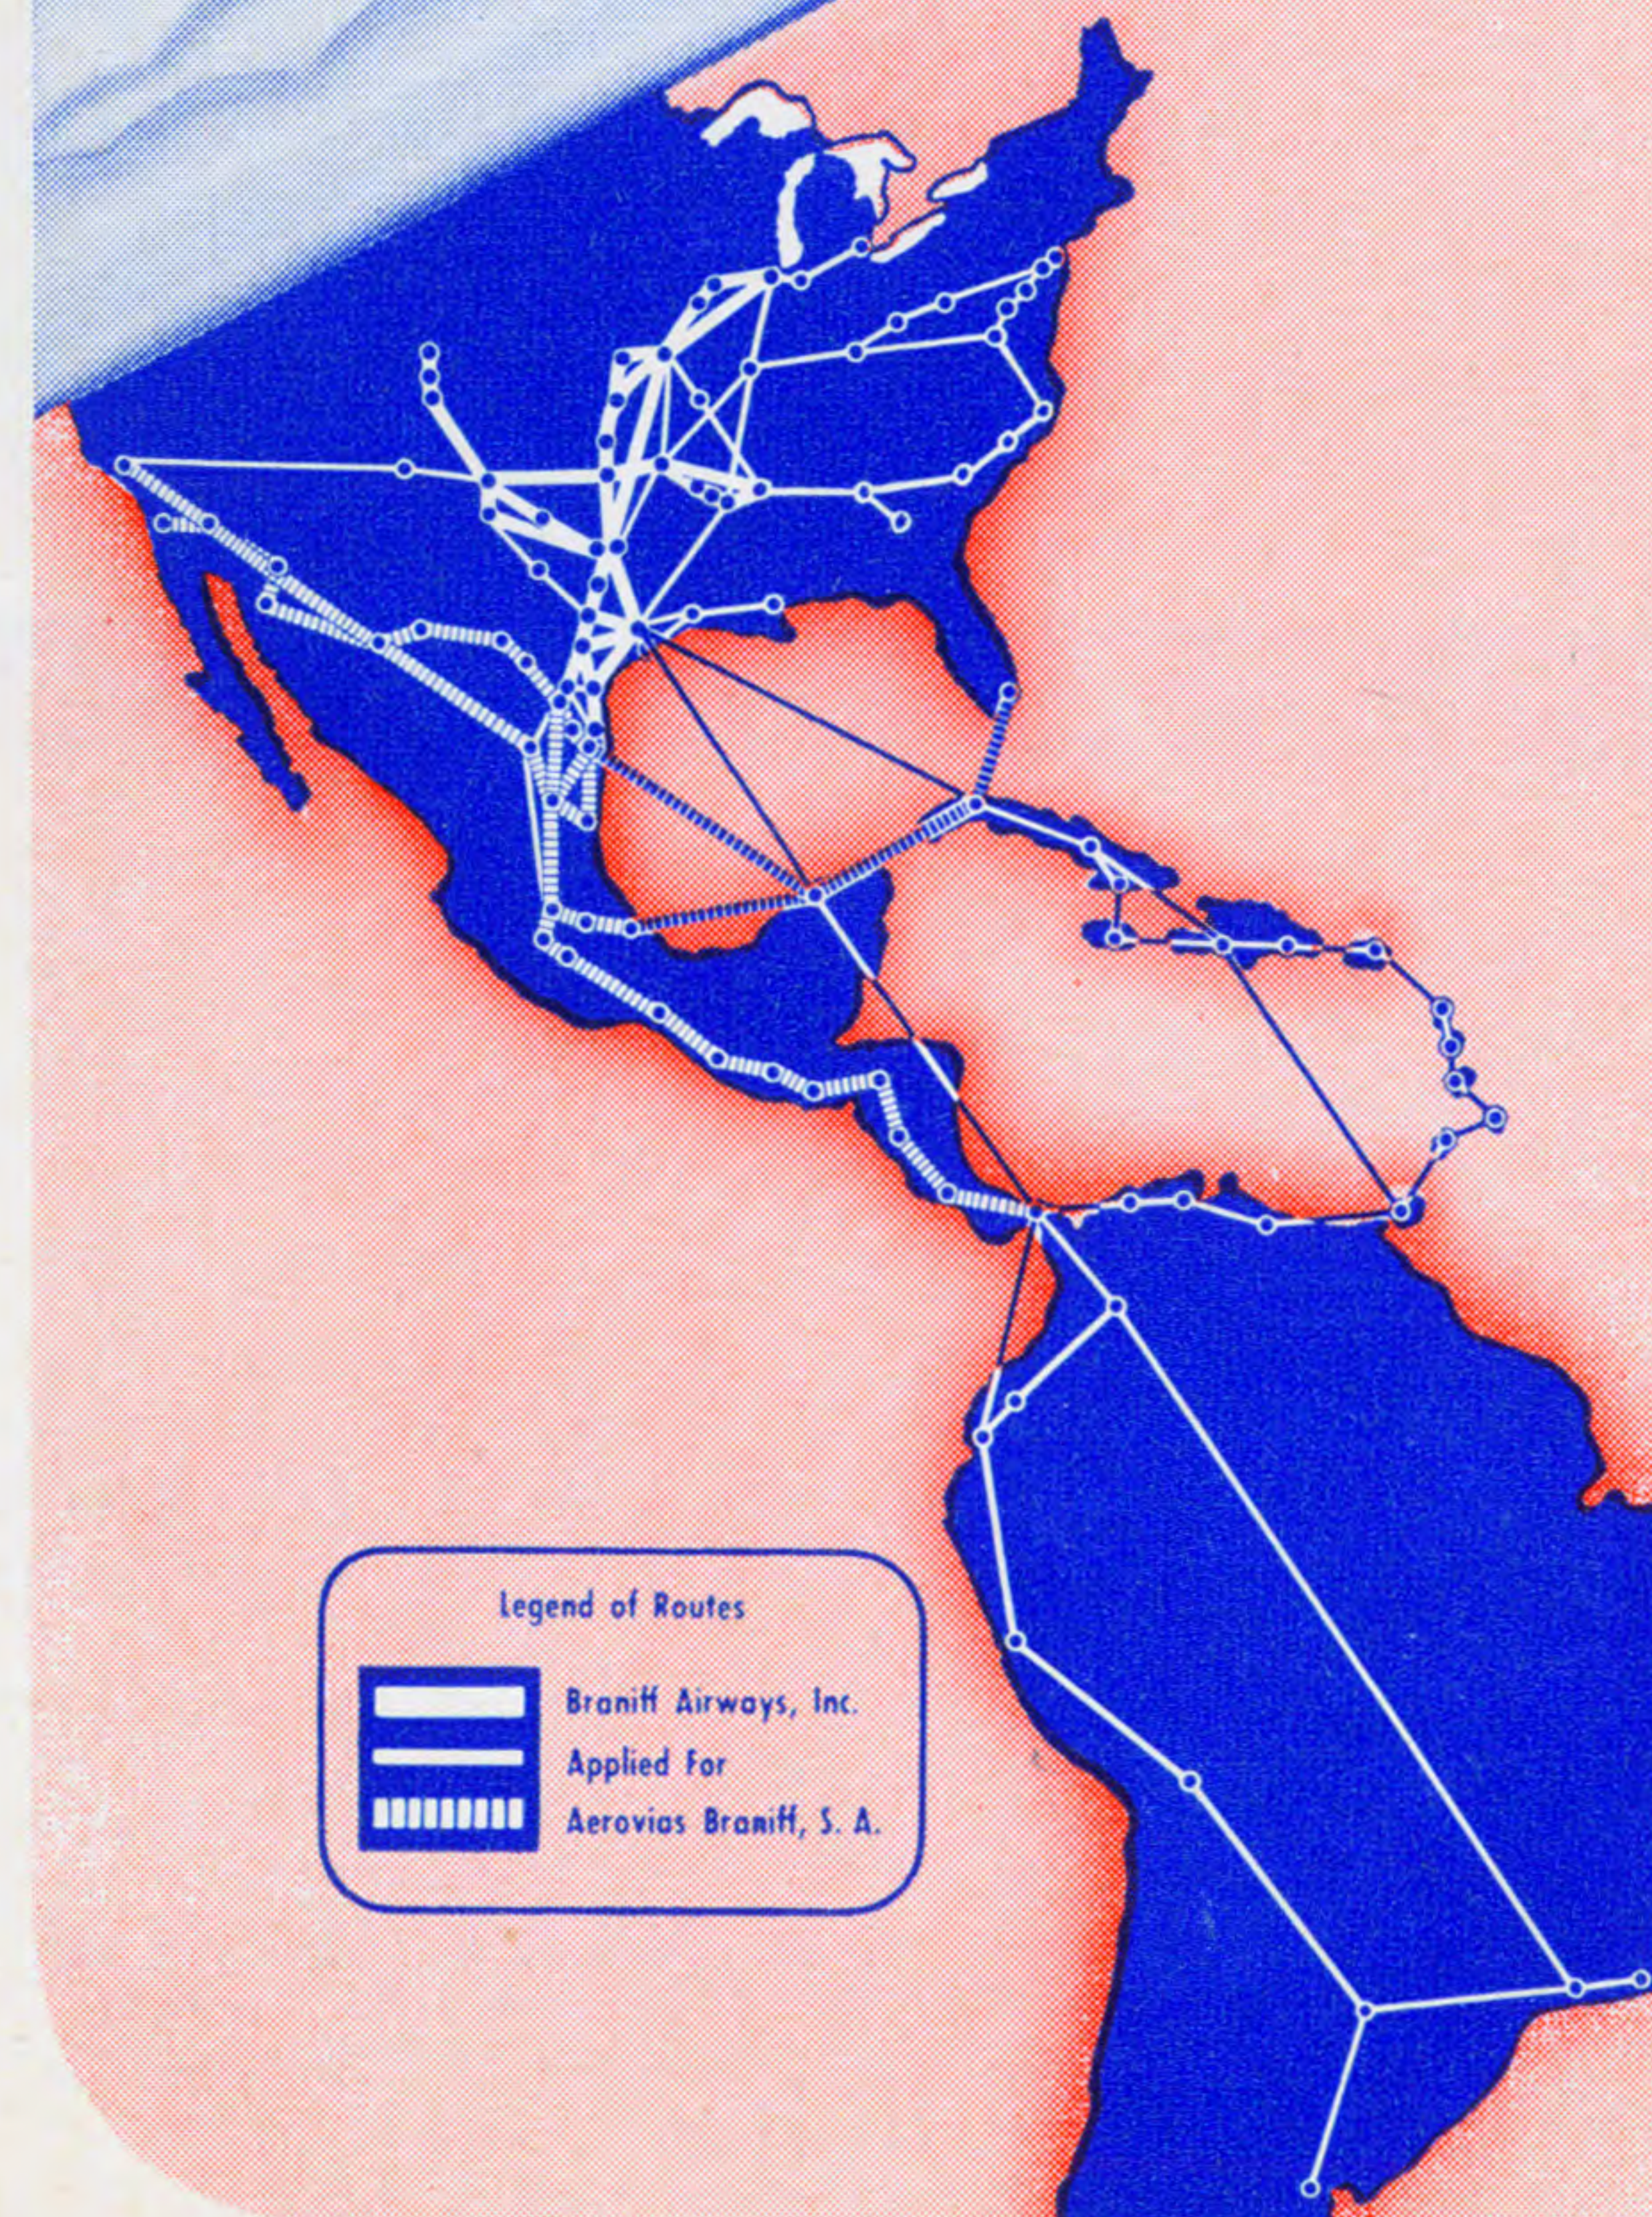

Deep into every individual's life goes the influence of flight. It creates friendships and promotes permanent peace. It accelerates travel and enables business to speed activities. It rushes natural resources and finished products over vast distances. It removes isolation.

These things Braniff has recognized in its proposal to create a coordinated system of air transportation in the Western Hemisphere. Authorized under a plan of regulated competition this system will contribute substantially to full employment and prosperity among the nations served.
