BAGGAGE

Baggage Liability — Passenger name identification must be placed on the outside of all checked baggage. Baggage identification labels are available from United at no cost. Liability for baggage between points in the U.S. will not exceed \$750.00 unless you declare a higher valuation and pay a slight extra charge. Excess valuation cannot be declared for certain checked valuable items such as jewelry, negotiable instruments, currency and antiques. Excess Baggage — Baggage in excess of the free baggage allowance, up to and including four pieces, will be charged a standard excess fee of \$8.00. Excess baggage exceeding these four pieces will be charged four times the applicable excess baggage rate. Overweight or oversize baggage is subject to special charges as are the following special items listed below. These items are subject to the special charges regardless of the total baggage carried.

\$24.00 per checked container

Free Baggage Allowance — (Per passenger) 1 piece of baggage with linear dimensions (length + height + width) not exceeding 62 inches, plus 1 piece of baggage with linear dimensions not exceeding 55 inches. Class of Service — On United, you can fly First Class, Coach, or—on certain routes—Economy. First Class gives you spacious seating comfort and—time permitting—our most luxurious personalized service: complimentary cocktails, gourmet dining, and a variety of other amenities. Coach seating is comfortable but more compact and meals are hot, delicious, satisfying. Economy offers the same comfortable seating as Coach, without meals and including coffee, tea and soft drinks. Liquors, wines, etc. are available at a nominal charge in both Coach and Economy. All these services include the friendly hospitality of United's dedicated employees.

Electronic Devices — Federal Aviation regulations prohibit inflight operation of electronic devices other than portable dictation recorders, electronic calculators and games, electronic watches, hearing aids, heart pacemakers and electric shavers. Other electronic devices (including AM and FM transmitters and receivers, portable telephones and remote controlled toys) may interfere with communication and navigation systems on the airplane and are therefore prohibited.

United's 767.

If you had a favorite airplane, this one's going take its place.

Early this fall United Airlines' first 767 will inaugurate a new era of commercial flying.

This 767 will be the first of 39 that United Airlines has ordered.

The airplane itself, even though new, is probably the most thoroughly discussed, thoroughly designed, thoroughly tested plane in the history of commercial aviation. The memos and drawings of the Boeing Commercial Airplane Company date back to a first meeting with United, conducted almost exactly nine years ago.

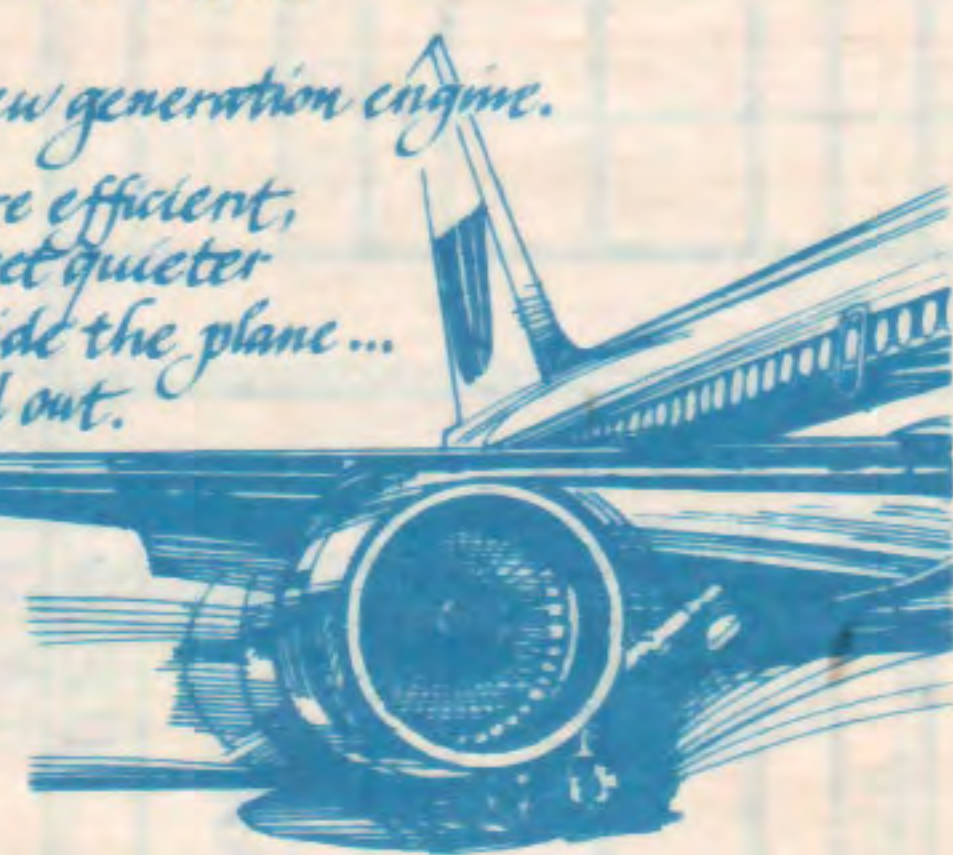

Since then, United has suggested more than 200 modifications that are incorporated in the final design. The 767, therefore, is an ideal example of the country's largest builder of commercial jets cooperating with the country's largest airline to bring passengers the airplane they want.

United's 767 responds to the stunning escalation in fuel costs. It is up to 35% more fuel-efficient than the jet it is designed to replace. The wing, the engine, the computerized instrumentation focus sharply

on efficiency. United's 767 will do everything possible to hold down the cost of air fares.

A new generation engine.

more efficient, ... yet quieter inside the plane ... and out.

There are also innovations in passenger comfort. Seats, stowage for carry-on luggage and video entertainment are all improved.

United's new 767 is designed with an advanced technology wing. In cross-section, this wing is thicker than any of the first-generation jets. The design increases lift without increasing drag. It was also possible to make the wing stronger and longer. Because of these features, the 767 gets off the runway more quickly ... and up to the altitude where jets are meant to fly at their efficient best.

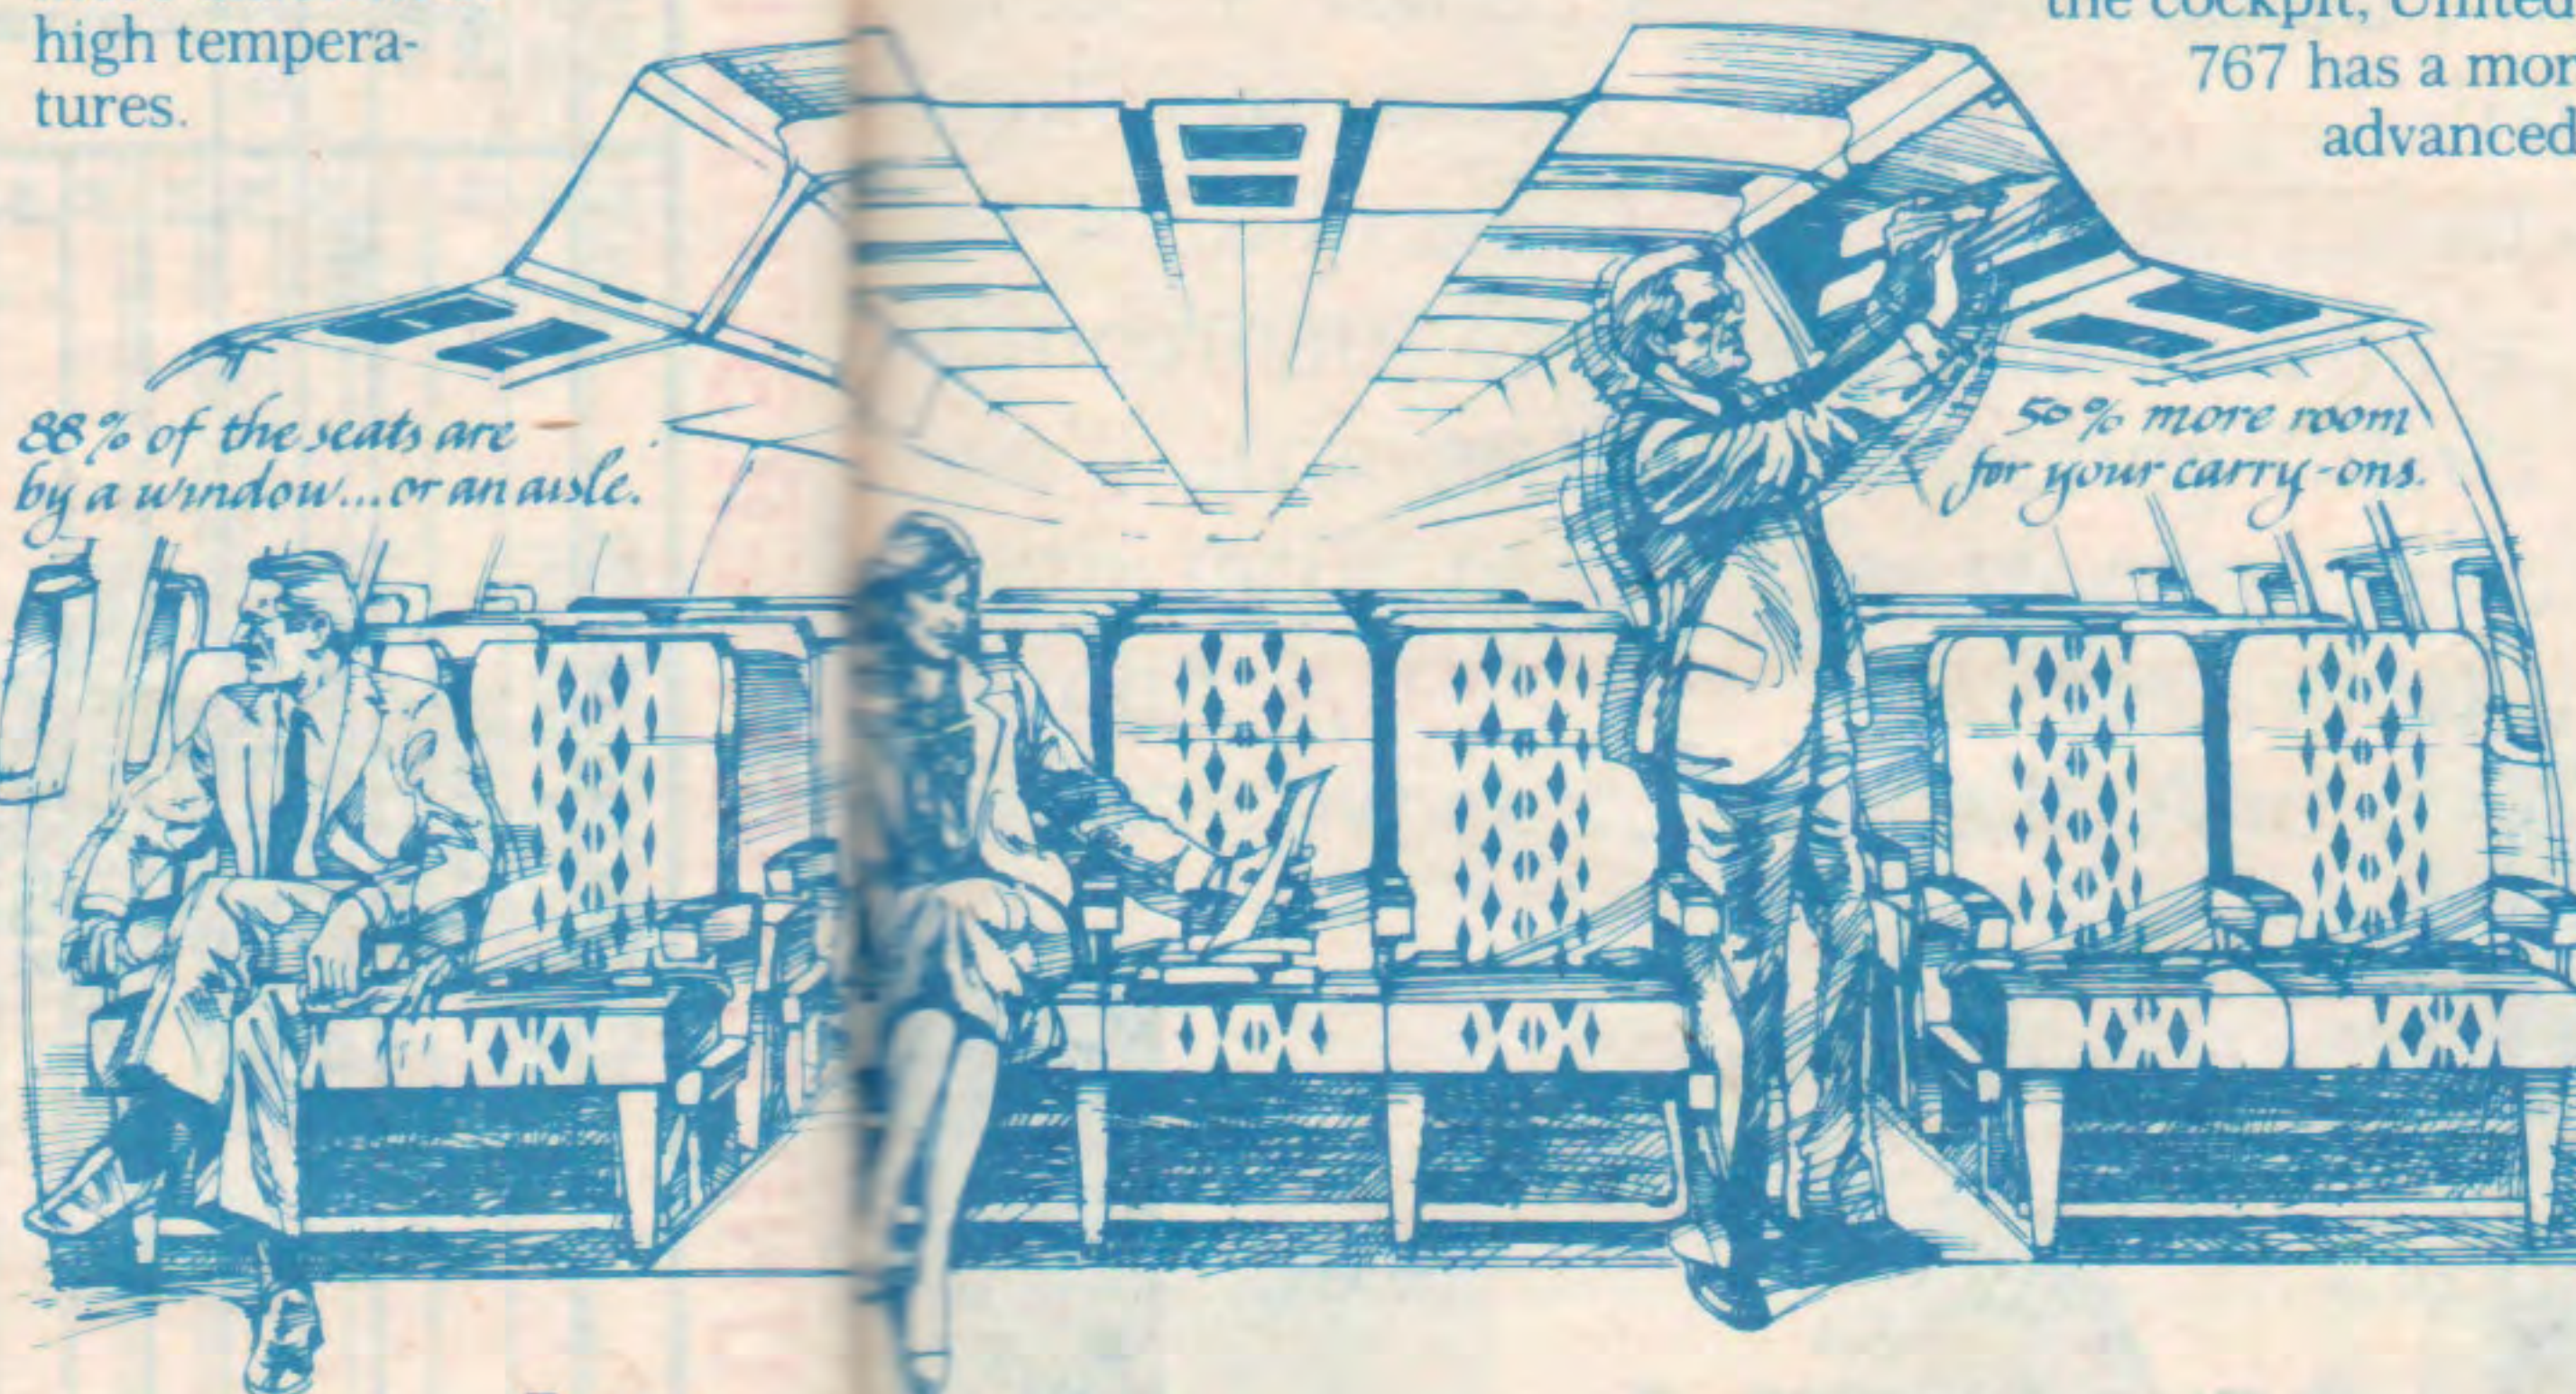

Pratt and Whitney's new-generation engine is the strong, silent type. It

delivers more thrust, yet is quieter — inside the plane and out — than earlier engines.

This JT9D features a unique metallurgical breakthrough: turbine blades of "single-crystal" construction make the engine more efficient at high temperatures.

contoured headrest.

Coach seats are wider than most other Coach seats you have known. Without reducing comfort, they are also leaner, less bulky — so you will find considerably more room for your knees,

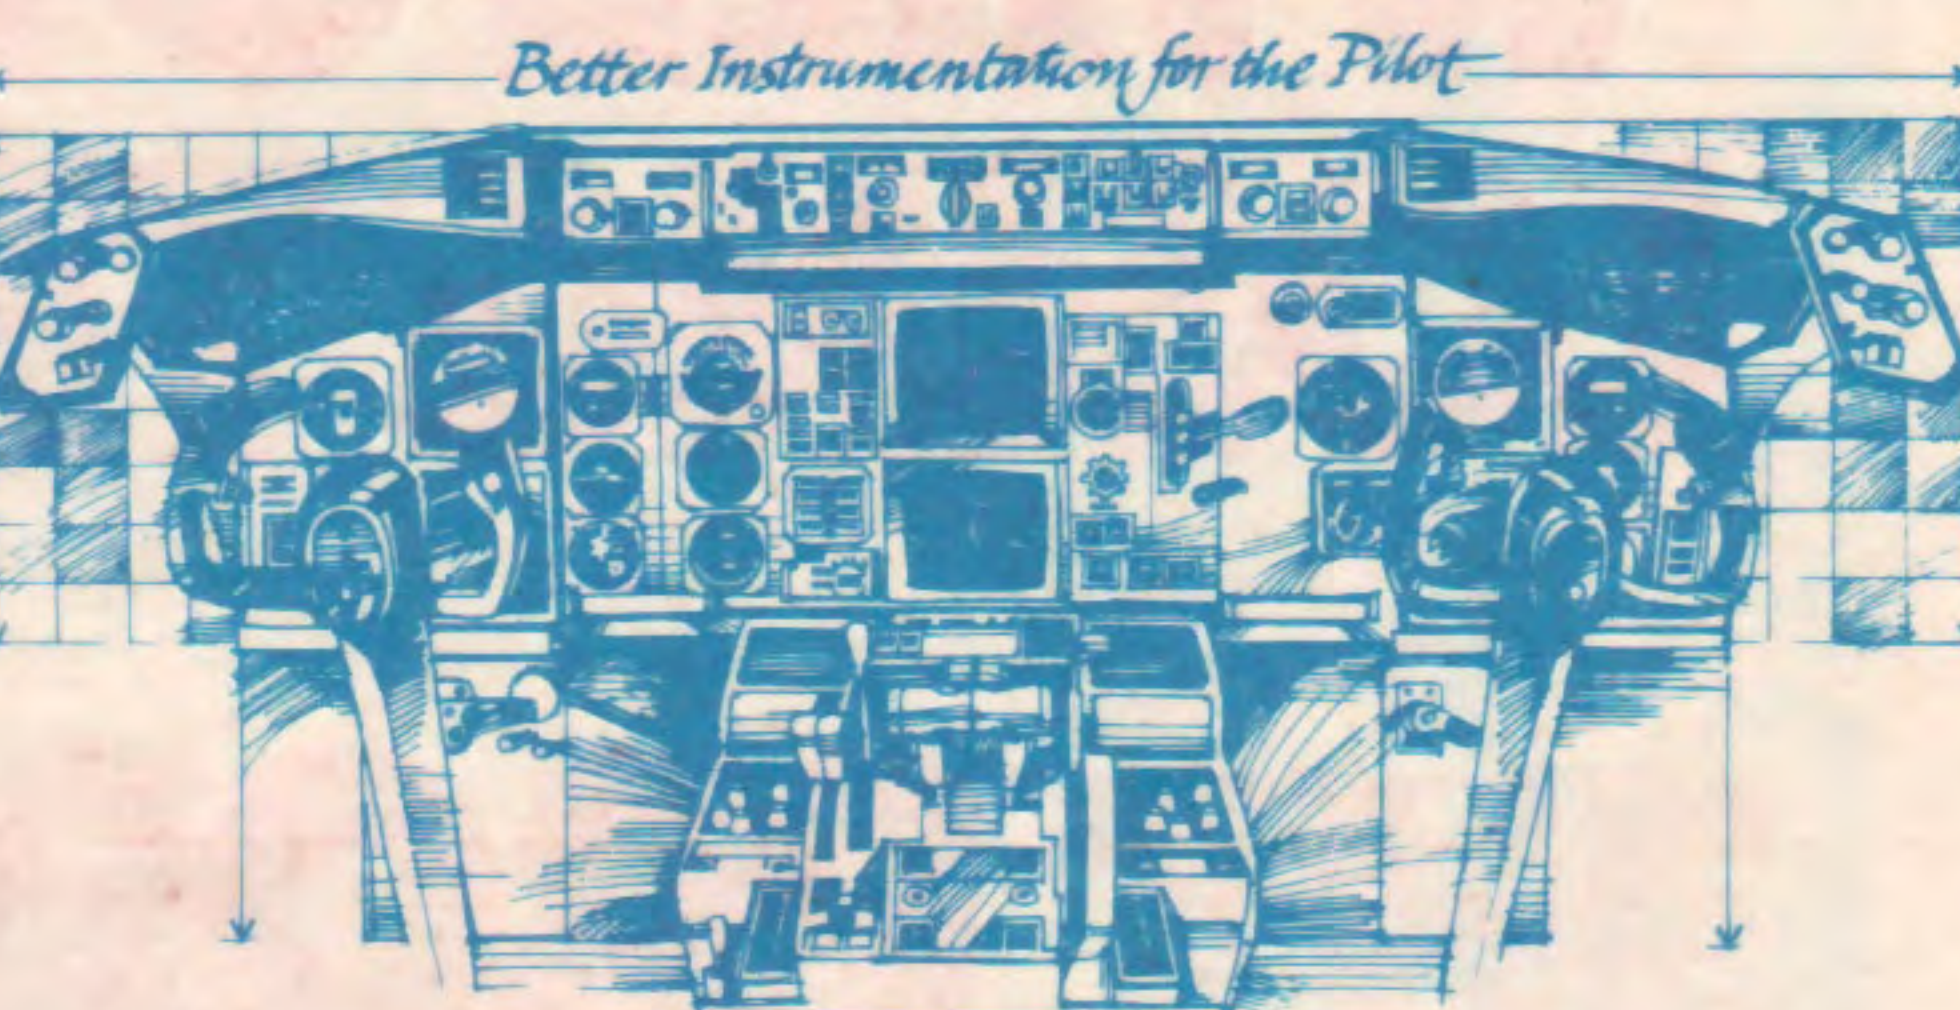

For passenger comfort, the seats in United's 767 are arranged along twin aisles. In First Class, this means 2x2x2. In Coach, it is a generous 2x3x2. A full 88% of the seats are next to an aisle, or next to a window.

And what seats they are! First Class seats are gray leather with a comfortable,

even though there is the same overall distance between rows of seats. Chairs are a new orthopedic design that supports the lower back and increases comfort.

No passenger has ever had as much space for carry-ons as the 767 offers. There is the customary under-seat

storage, and the customary big-plane closets for coats and garment bags. There are also large roll-up closets. And additionally, the overhead storage features 88-inch bins that even allow garment bags to be laid out flat. In the cockpit, United's 767 has a more advanced

many of the systems such as air conditioning, brakes, hydraulics and pressurization. Some of the computers monitor airplane systems to assure they are functioning properly.

A Flight Management System, using an inertial reference system with space-age laser gyros can keep the 767 headed for its destination on a Great Circle Route (the shortest, most efficient route home).

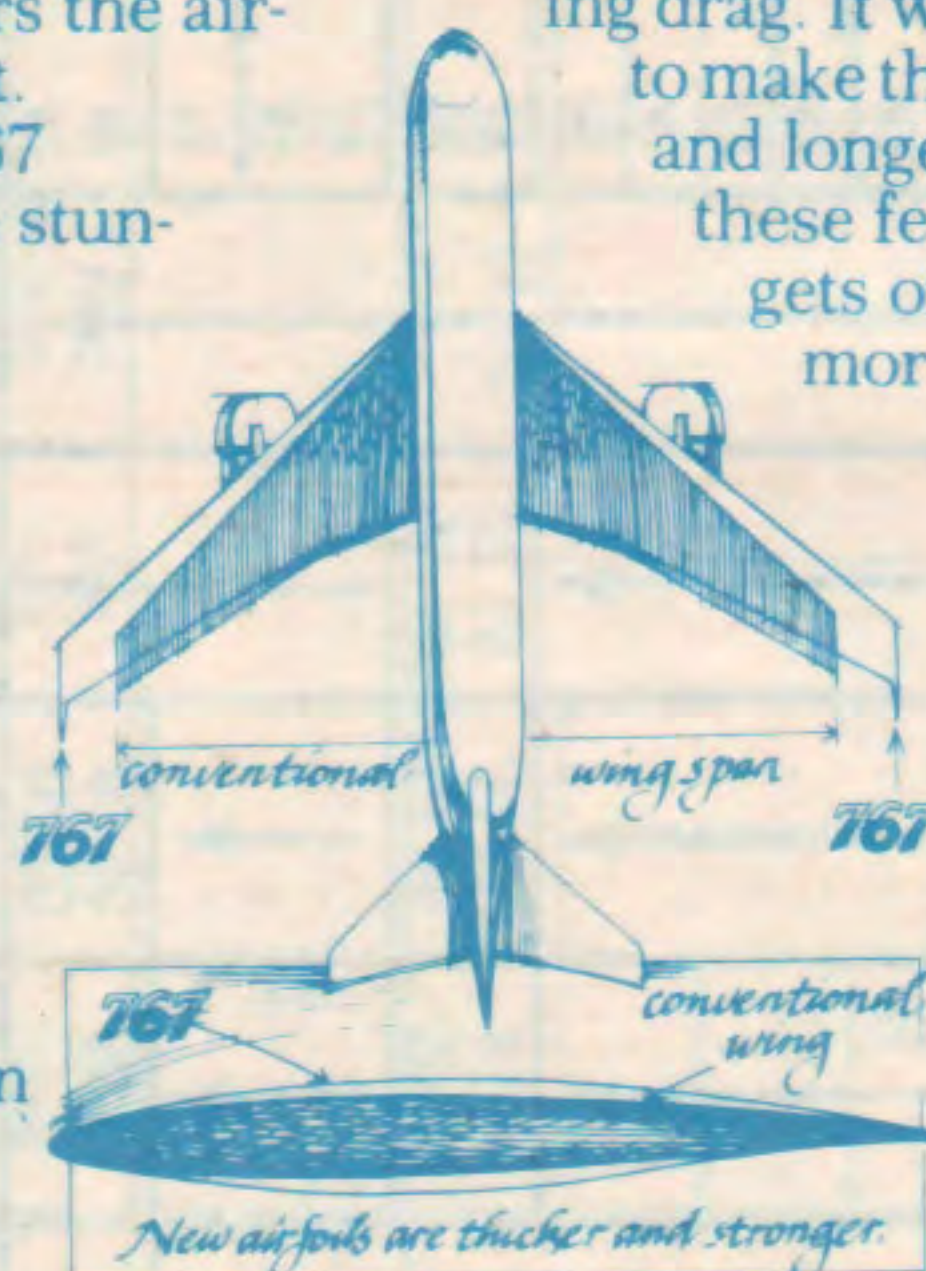

An Electronic Horizontal Situation Indicator enables the pilot to call up exactly the picture he wants to see on a video screen: the map of the ground ... the aircraft track ... the flight plan ... the wind speed and direction ... and even the weather up ahead. All this information can even be superimposed on the screen at one time to give a complete picture.

The 767 flight deck has more useful information for pilots than any other passenger plane in the sky.

All this is no more than "the tip of the iceberg" of the remarkable improvements in United's new 767.

Full appreciation of this remarkable new jet must await your first 767 flight.

"HELLO, UNITED..."

ANYTHING GOES UNITED AIR CARGO

"Come to Kauai, Molokai, Maui and The Big Island. Come to the other Hawaii."

*"No one should miss the 'mana'—the special magic—
of these peaceful Islands. Ask me about 'The Other Hawaii'
on your way to Hawaii, in the friendly skies."*

Kauai.

The Garden Isle. A dazzle of bougainvillea, poinsettia, jacaranda and plumeria.

Captain Cook made his first Hawaiian landing at Waimea. Today it's a colorful plantation town. Nearby is majestic Waimea Canyon.

Molokai.

An island of tranquillity, from the emerald green cliffs guarding the northern shore to the camping paradise of Wailau Valley. There are more native Hawaiians per capita on Molokai than anywhere else on earth. Maybe that's why it's called The Friendly Island.

Maui.

The tropical splendor of Hana, royal resort of Hawaiian kings. Sunrise over awesome Haleakala crater. Lahaina, once the whaling capital of the world, now restored to the look of its 19th century heyday. The famed beaches of Wailea and Kaanapali. They're just a few of the marvels of Maui.

Hawaii.

The great volcanic peaks, Mauna Loa and Mauna Kea, tower above this island of orchids (over 22,000 varieties!) and black sand beaches. Offshore is deep-sea fishing famous the world over.

No other airline knows the wonders of "The Other Hawaii" like United. This year, why not come to our little corner of the world.
