WESTERN AIR LINES and INLAND AIR LINES

combine to give better air transportation service to the west

MARKING one of the largest domestic consolidations on record, the Civil Aeronautics Board, on May 24, 1944, approved Western Air Lines' purchase of control of Inland Air Lines. The addition of this 1265-mile air network increases Western's total route mileage to 3309.

As shown on the above map, Inland Air Lines operates from Denver in a northwesterly direction via Cheyenne and Billings and joins Western's trunk line at Great Falls, Montana. A second route operates from Cheyenne northeasterly via Rapid City to Huron, South Dakota.

Western Air Lines is no stranger to much of this region, having pioneered air mail service between Cheyenne, Denver and Pueblo from 1927 to 1934. Inland, also, is a pioneer company, its first operations dating back to 1931. Today it is handling a large volume of essential transportation with its fleet of swift Lockheed Lodestars.

Inland's personnel will be incorporated into the growing Western Air Lines family which, since 1926, has been working and planning for the upbuilding of air transportation in the West.
